LEAD-RISK WORK NOTIFICATION

This form is to be used to notify of lead risk work to Worksafe Tasmania (the Regulator) as required by the WHS Regulations. A person conducting a business or undertaking (PCBU) at a workplace must notify the Regulator 7 days before the lead risk work is undertaken. You must keep a copy of this notice while you are undertaking lead risk work and ensure a copy is readily accessible to workers likely to be exposed to lead, and their health and safety representatives.

Details of lead-risk work

Lead risk work means work in which the blood lead level of the employee is reasonably likely to exceed:

- a) 0.97 micromoles per litre ($\mu\text{mol/L}$); or
- b) 0.24 $\mu\text{mol/L}$ for females of reproductive capacity.

Address of workplace where the lead-risk work will be performed

Scheduled date of lead-risk work

Description of lead process to be carried out (tick the appropriate boxes)

work that exposes a person to lead dust or lead fumes arising from the manufacture or handling of dry lead compounds;

work in connection with the manufacture, assembly, handling or repair of, or parts of, batteries containing lead that involves the manipulation of dry lead compounds, or pasting or casting lead;

breaking up or dismantling batteries containing lead, or sorting, packing and handling plates or other parts containing lead that are removed or recovered from the batteries;

spraying molten lead metal or alloys containing more than 5% by weight of lead metal;

Description of lead process to be carried out (tick the appropriate boxes)

melting or casting lead alloys containing more than 5% by weight of lead metal in which the temperature of the molten material exceeds 450°C;

recovering lead from its ores, oxides or other compounds by thermal reduction process;

dry machine grinding, discing, buffing or cutting by power tools alloys containing more than 5% by weight of lead metal;

machine sanding or buffing surfaces coated with paint containing more than 1% by dry weight of lead;

a process by which electric arc, oxyacetylene, oxy gas, plasma arc or a flame is applied for welding, cutting or cleaning, to the surface of metal coated with lead or paint containing more than 1% by dry weight of lead metal;

radiator repairs that may cause exposure to lead dust or lead fumes;

fire assays if lead, lead compounds or lead alloys are used;

hand grinding and finishing lead or alloys containing more than 50% by dry weight of lead;

spray painting with lead paint containing more than 1% by dry weight of lead;

melting lead metal or alloys containing more than 50% by weight of lead metal if the exposed surface area of the molten material exceeds 0.1 square metre and the temperature of the molten material does not exceed 450°C;

using a power tool, including abrasive blasting and high pressure water jets, to remove a surface coated with paint containing more than 1% by dry weight of lead and handling waste containing lead resulting from the removal;

a process that exposes a person to lead dust or lead fumes arising from manufacturing or testing detonators or other explosives that contain lead;

a process that exposes a person to lead dust or lead fumes arising from firing weapons at an indoor firing range;

foundry process involving melting or casting lead alloys containing more than 1% by weight of lead metal in which the temperature of the molten material exceeds 450°C;

a foundry process involving dry machine grinding, discing, buffing or cutting by power tools lead alloys containing more than 1% by weight of lead metal;

a process decided by the regulator to be a lead process under regulation 393

Declaration

I declare I am over the age of 18 years and I have the authority to complete and submit this notification.
I consent to the Regulator making enquiries and exchanging information with WHS regulators in other states, territories and/or the Commonwealth regarding any relevant matter to this application.
